

VITA 67.3 Developer Kit

Features & Benefits

- Choose from four pre-packaged VITA solutions
- Quick testing solution for VITA 67.3 Plug-In Cards
- Available in Series: SMPM, SMPS and NanoRF
- Available in distribution

Shorten and simplify the time and effort needed to test your VPX Plug-In Card design. Our VITA and SOSA subject matter experts have put together a complete testing kit that includes all the essentials you'll need. Ideal for prototyping and production-level testing, This Developer's Kit includes the below and is housed in a compact travel case:

- Multiport Module
- VITA RF Cable Assemblies
- Screws and Driver Tool
- Contact Installation and Removal Tools
- Application Notes
- Links to Web-based Resources
